## THE NIGHT MOTHS OF NEW ENGLAND

HOW TO DETERMINE THEM READILY

BY EDWARD KNOBEL.

BOSTON: PUBLISHED BY BRADLEE WHIDDEN

Copyright, 1895, by

E. KNOBEL.

## NOCTURNAL LEPIDOPTERA.

The night moths, or millers (nocturnal lepidoptera) are distinguished from all other butterflies by their feelers, which taper from their base to the point and are often feather-like; by their wings which, when at rest, are shut upper-side outward and more or less steep or roof-like over their bodies.

The different families have been arranged in seven groups, of which the first three embrace the larger moths. These three groups lead gradually from one to another with no distinct line of demarcation, so that often a spinner is taken for an owlet, or a geometer for a spinner. Therefore, if a specimen cannot be found in the group that it seems to resemble it will be found in another similar to it. The last groups contain the smaller moths, which are mostly recognized by parts of their heads and veins of their wings, — too minute for consideration in this book. Only a few, therefore, of each family are represented to give an idea of their character. On account of the great number of moths, the majority of which are so nearly alike in coloration and size, as well as the variations in size and color among themselves, — the females often being double the size of the males, — it is always difficult to determine the name of a moth which has no decided markings. Even their own wear and tear make them often unrecognizable.

Abbreviations used in the descriptions are as follows: f. for forewing, h. for hindwing, c. for food plant of the caterpillar. The word "like" is used, meaning similar in shape and marking, but not in color and size.

Retu

#### THE MOTHS are divided into the following groups:

OWLETS: — Feeler hair-like and smooth, or sometimes a little comb-like; forewing narrow, generally marked with zigzag cross lines and two peculiar dots or eye marks; body stout, head and mouth-feeler prominent. Caterpillars form mostly naked pupæ or with only a few hairs which they bury in the ground . . . . Noctuce, Page 22.

- 4. Deltoids or Snout Moths: Feelers hair-like; mouth feelers long, forming a long snout; legs long. They close their wings in shape of a triangle or roll them around their bodies like a cloak
- TRUE MOTHS: Small moths with a long, silky fringe around the edge of
  each wing, the wing itself narrow . . . . Tineidae, Page 62.

- 25. Metrocampa perlaria; 1<sup>3</sup>/<sub>4</sub> in.; pearly white, crossed by 2 white lines on forewing and 1 on hindwing.
  - Anagoga pulveraria; 1\frac{1}{4} in.; pale rusty gray with lilac tinge.
- 26. Sicya macularia; 1½ in.; bright yellow, buff and brown.
- 27. Angerona crocataria; 2 in.; bright yellow with faint brown marks. Feeds on currant and strawberry.
- 28. Nematocampa 'filamentaria; 1 in.; transparent cream and brown. Feeds on currant and strawberry.

- 29. Plagodis phlogosaria; I in.; forewing, orange; hindwing, lighter; both brown marked.
  - "

    fervidaria; 1¼ in.: yellow, without dusky streak in border.
  - " kreuzingaria; 1¼ in.; buff, a dark and light line on hindwing.
  - " alcoolaria; 15 in.; pale yellowish tinge, one line on hindwing.
  - " serinaria; 1½ in.; bright yellow, only a fraction of a line.
- 30. Hyperetis nyssaria; 1¼ in.; transparent white, brown speckled. Feeds on beach and hypericum.
- 31. Geometra iridaria; 14 in.; green with purplish and white line.
- 32. Aplodes mimosaria; ½ in; green with white lines. Feeds on oak.
- 33. " rubrifrontalia; 1½ in.; green, white edge and lines.
- 34. Synchlora rubivoraria; 1 in.; green and white. Feeds on blackberry.
  - Nemoria subcroceata; 1 in.; like 35, bright buff yellow.
    - gratata; ¼ in.; faint lines; dull green.
      pistachata; 1 in.; like 34; deep green.
- 35. Eucrostis chlorolcucaria; † in; pale green with white lines.
- Dyspteris abortivaria; 1¼ in.; greenish gray, white bands; feeds on sunflower.

#### Phalænidæ,

37.	Ephyra pendulinaria; 1 in.; cream and light
	brown. Feeds on sweet fern.
38.	" myrtaria; 1 in.; transparent white, brown
3	sprinkled. Feeds on sweet fern and
	huckleberry.
39.	Acidalia insularia; 3 in.; pale green.
10.	" nivosata; 1½ in.; white, with dots on under side of each wing.

- side of each wing.

  41. "inductata; 1 in.; buff and darker marks; f.
  4 lines, h. 3 lines and dots.
- 42. " quadrilineata; 1 in.; like 41; less inner lines, white and buff lines.
- 43 " enucleata; 1½ in.; white and gray. Feeds on deer grass.
  - " cacuminata; 3 in.; cream and brown, like 43.
  - " rubromarginata; 3 in.; brown, with reddish tinge, like 42; lines broader.
- " ossulata; <sup>a</sup> in.; gray; 5 lines in forewing.

  44. Asthena albogitvaria; <sup>a</sup> in.; white with 3 buff
- bands.

  " lucata: 1 in:; white, brown and ochre.

  Eois ferrugata; \(\frac{3}{4}\) in:; brick red, with 4 brown lines.
- 45. Stegania pustularia; 1½ in.; white, speckled with yellow; indications of bands. Feeds on maple.
  - Gueneria basiata; 11 in.: cream, yellow lines, blurred.

- 6. Deilinia variolaria; 1 in.; cream and white.
- 47. " erythemaria; I in.; cream with yellow speckles and bands.
- 48. Eudeilinea hermincata; 15 in.; white, 2 rows dusky spots on forewing.
- 49. Corycia vestaliata; 1 in.; white.

  " semiclarata; 1 in.; white and 4 gray bands;
  2 rows of dots on hindwing.
  - Eumacaria brunnearia; 1 in.; gray with brown marks.
- 50. Semiothisa preatomata; 18 in.; cream, buff and red brown sprinkled. Feeds on blue-
- 51. " bisignata; 1 1 di in.; light yellowish gray, speckled brown,
- 52. " enotata; 11 in.; light yellowish.
  - " granitata; 1 in; granite gray, coarsely speckled.
- 54. " ocellinata; 1 in.; pale gray.
  - " multilineata: 11 in.; like 51, lines stronger, and double, pale gray.
    - ·· minorata; ¼ in.; like 50; lines stronger, pale gray.
  - 55. Phasiane orillata; 11 in.; silver white with brown and black.
  - Marmopteryx strigularia; 1½ in.; dark ash gray.
     Thannonoma wavaria; 1¼ in.; pale chocolate
  - 57. Thamnonoma wavaria; 14 in.; paie chocolate brown. Caterpillar feeds on currant.
  - " subcessaria; 1} in.; white with few black marks, like 57.

53.

#### Phalænidæ.

	spots.					

brunnearia; 1½ in.; brown, like 57. b.
 argillacearia; 1½ in.; pale brown, no spots.

59. Lozogramma disconventa; 1 in.; cream, brown sprinkled.

60. " detersata; 1½ in.; white, dull yellow sprinkled.

61. "atropunctata: 14 in.; buff, gray and black speckles.

62. " defluata; 1½ in.; forewing ashy gray with two brown bands; hindwing white.

63. Eufitchia (Abraxis) ribearia; 14 in.; light yellow and gray brown. Caterpillar feeds on currant.

6.4. Caripeta angustiorata; 1½ in.; forewing white and orange; hindwing white. Caterpillar feeds on pines.

" divisaria; 1½ in.; like 64; white and brown.
65. Ematurga faxonii; 1½ in.; cream and red brown.

66. Eufidonia notataria; 1 in.; white, brown and gray.

Caterpillar feeds on pine.

Fidonia truncataria; ¼ in.; rusty orange, like 65.
67. Hamatopis grataria; 1 in.; orange and red.

68. Zerene catenaria; 11/2 in.; white with black spots.

69. Cleora pulchraria; 14 in.; white and gray with black lines. Feeds on pines.

70. Hemerophila unitaria; 21 in.; buff, brown and black.

 Cymatophora crepuscularia; 1½ in.; white, brown sprinkled. Caterpillar feeds on willow and poplar.

" pampinaria; 1½ in.; pale ash gray, like 71.

" humaria; 1½ in.; white dusted brown, border dark.

" larvaria; 1½ in.; whitish gray; 3 spots on tip of forewing.

" umbrosaria; 1½ in.; white with black lines.

72. Tephrosia canadaria; 1 in.; gray, brown speckled.

"cribrataria; 1½ in.; like 68; ashy buff
with strong brown sprinkle and an
additional row of dots in border.

" anticaria; 1 in.; dull ash gray, like 73; but one more line in each wing and separate.

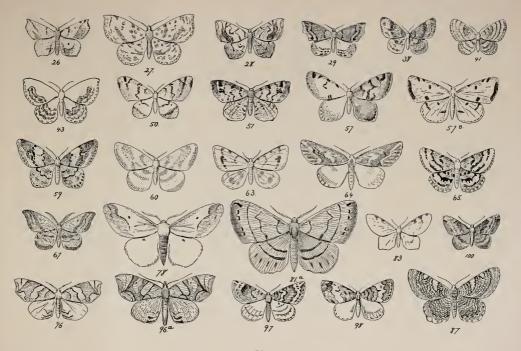

73. " cognataria; 1\frac{1}{2} in.; pearly gray.

74. Paraphia subatomaria; 13 in.; white, dark brown marked and sprinkled. Caterpillar feeds on pine.

75. "

deplanaria; 1¼ in.; like 74; buff and light brown. Caterpillar feeds on spruce.

 Biston ursaria; 2 s/2 in.; gray and black with white band in border. Feeds on poplar.

#### Phalæntidæ.

77.	Amphidasis cogn	uataria; 21 in.; brown, black marked	
		and sprinkled. Caterpillar feeds on	
		maple, currant.	

Eubyja quernaria; 2½ in.; white and brown speckled; 2 dark lines in forewing and one in hindwing; like 77.

- 78. Hybernia tiliaria; 2 in.; pale yellow with orange speckles; hindwing white.
- c. Linden, elm and pear.

  79. Phigalia strigataria; 1½ in.; white and dark brown sprinkled on forewing.
- c. Rose and elm.
  80. Anisopteryx vernata; 1½ in.; the spring cankerworm; f. gray and brown, h. white.
- c. Elm, pear and apple.

  81. " autumnata; 1\frac{1}{2} in.; the fall canker-
- worm; yellowish gray and brown.

  c. Elm, pear and apple.

  Astilates dissimilaria: 11 in hight yellow and
- Aspilates dissimilaria; 1½ in.; bright yellow and red.
- 81. a. " lintneraria; 2 in.; dull reddish yellow.
- 82. Operophtera boreata; 14 in.; white and brown.
- 83. Heterophelps trignttata; 1 in.; pale yellow and brown. Caterpillar feeds on maple.
- 84. Odezia albovitata; 1 in.; black and white.
- 85. Carsia paludata; 1<sup>1</sup>/<sub>8</sub> in.; f. gray and brown; h. rusty.
- 86. Lobophora vernata: 1¼ in.; f. white and brown; h. white,

# PYRALIDÆ, TORTRICIDÆ, TINEIDÆ, PTEROPHORIDÆ.

## PYRALIDÆ. Deltoids, Snout-moths.

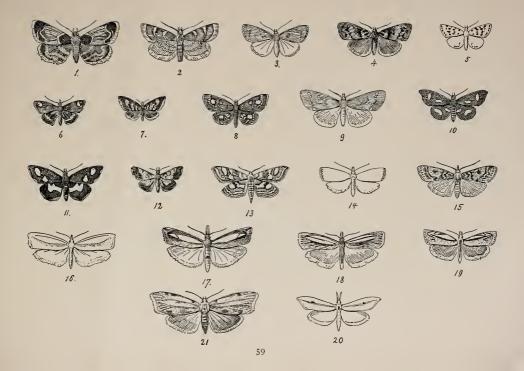

- 1. Pyralis (Asopia) farinalis; 1 in.; buff and brown with white border lines.
  - c. Flour and meal. costalis; 7 in.; lilac with gold fringes.
- c. Clover,
- 3. Cordylopeza nigrinodes; \( \frac{3}{4} \) in.; f. strong buff with white dots; h. white.
- 4. Scoparia centuriella; 7 in.; gray brown and black.
- 5. Theleteria pupula; ½ in.; f. cream color with dark brown dots; h. white.

2.

- 6. Botis generosa; 5 in.; orange and dark brown.
  - c. Horse mint.
- 7. " haruspica; ½ in.; f. orange and brown; h. gray.

  8. " histilis: 3 in. f. orange and brown; h. white
- 8. " plectilis; \(\frac{3}{2}\) in.; f. orange and brown; h. white and brown.
- 9. " ventralis: 7/8 in.; f. orange buff; h. buff.
- 10. " octomaculata; \(\frac{3}{4}\) in.; black brown with white spots.
- 11. Desmia maculalis; 3/4 in.; dark brown with white spots. c. Grapevine.
- 12. Cindaphia bicoloralis; 5 in.; orange and brown.

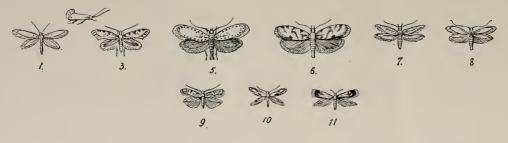

- 13. Hydrocampa genuinalis;  $\frac{3}{4}$  in.; white and orange with black lines. c. Lives in water.
- 14. Argyia nivalis;  $\frac{3}{4}$  in.; silky white with gold edge.
- Myelois convolutella; <sup>T</sup>/<sub>8</sub> in.; gray with black and white marks. The gooseberry worm.
- Crambus girandellus; 1 inch.; satin white, with a broad gold yellow streak in middle of forewing.
- 17. " agitatellus; ¾ in.; f. buff and white, with dark brown lines; h. light buff brown.
- 18. " laqueatellus; 1 in.; f. white, buff and brown shades: h. light brown with cream colored fringe.
- 19. " topiarius: \( \frac{3}{4} \) in.; f. cream, buff and brown lines; h. light brown with white fringe.
- 20. Schænobius longirostrella; 1 in.; f. buff with brown line and dot; h. white.
- 21. Galeria cereana; 1¼ in.; gray and purplish brown.
  c. Lives in the honeycomb of bees.

# TORTRICIDÆ. Leaf-rollers.

1.	Antithesia pruniana; 5 in.; gray and dark brown and cream; hindwing light brown.	10.	Pædisca dorsisignatana; 🖁 in.; light brown with reddish brown marks.
	c. Lives on plum.	11.	" otiosana; ½ in.; brown and black; hind-
2.	Tortrix sulfuriana; \(\frac{1}{2}\) in.; light orange and		wing light brown.
	darker, hindwing light cream.	12.	" packardiana; 1/2 in.; gray and brown.
3.	Lozotænia rosaceana; ‡ in.; pale brown and dark	13.	Sericoris instrutana; } in.; dirty white and dark
J.	red brown; hindwing light orange.		brown.
	c. Rose, apple, strawberry.	14.	Carpocapsa pomonella; ½ in.; the apple worm gray
4.	" purpurana; 3 in.; dark brown with		and dark brown; hindwing brown.
	black blotches and marks.		c. Lives in apples and pears.
5.	" cerasivorana; 7/8 in.; bright orange with	15.	Anchylopera spircæfoliana; ½ in.; white, black and
	brown marks. c. Lives on cherry.		reddish stripe.
6.	" fragariana; 3 in.; copper red with	16.	2
	white spots on edge.		brown. Caterpillar lives on apple
	c. On strawberry.		and pear.
	Penthina fullerea: ½ in.; light and dark brown.	17.	" vacciniana; ½ in.; white and brown.
8.	Grapholitha interstinctana; § in.; dark brown with		c. Lives in cranberry.
	silver-white lines and dots.	18.	" fragaria; ½ in.; reddish brown spotted
9.	Ecdytsopha insiticiana; \(\frac{1}{3}\) in.; light and dark		with black and white, hindwing gray.
	brown.		c. Feeds on strawberry.

# TINEIDÆ. Moths.

- Tinea flavifrontella; ½ in.; the common clothes moth; light buff with silky shine; head reddish.
- tapetzella; the carpet moth; forewing cream, blackish on shoulder; hindwing dark gray.
- " granella; ½ in.; the grain moth; white, brown, and black marbled; hindwing light gray.
- 4. " pellionella; \( \frac{2}{3} \) in.; the fur moth; yellow silky with a brown spot in the middle of wing.
- 5. Hyponomeuta millepunctatella; 3 in.; white with dark dots; hindwing gray.

- Depressaria robiniella: <sup>3</sup>/<sub>4</sub> in.: red and brown; hindwing gray.
- Gelechia cercalella : ½ in.; light orange with darker spots.
- 8. Coleophora roswfoliella;  $\frac{1}{2}$  in.; pale gray and brown; hindwing darker.
- Lithocolletis geminatella; 1/5 in.; gray and black. Grub mines in apple and pear leaves.
- o. Bucculatrix pomonella;  $\frac{5}{16}$  in.; buff and black.

  Apple leaf miner.
- Lyonetia saccatella: <sup>3</sup>/<sub>16</sub> in.; gray, orange, white and black. Caterpillar carries a house like a snail. Feeds on apple.

# PTEROPHORIDÆ. Featherwings, Plume-moths.

- 1. Pterophorus pentadactylus; 7 in.; white.
- 2. " periscelidactylus; 5 in.; orange, gray and brown,
- 3. "monodactylus; 3 in.; buff and brown.
- 4. Oxyptilus inquinatus; ½ in.; grayish white.

- 5. Oxyptilus tenuidactylus; ½ in.; black.
- 6. Platyptilus bischoffii; 3 in.; buff and light brown.
- 7. Alucita polydactyla;  $\frac{1}{2}$  in.; each wing of six feathers. Feeds on honeysuckle flowers.
